

# Developer Documentation

## Welcome to the Wacom WILL Developer Documentation site

In a continual effort to better serve our developers, we are in the process of making updates and improvements to the Wacom Ink Developer Documentation site. While visiting our site, you may notice inconsistencies in formatting and/or the naming and classification of our products and services. Please know that this is all temporary as we continue to improve our site and that we are doing our best to provide you with the most accurate and helpful information, sample code, and documentation. Thank you for your ongoing patience.

The purpose of these pages is to provide supplementary technical information for software products downloaded from our primary developer website: <https://developer.wacom.com>

As a part of this initiative we are in the process of introducing the use of GitHub to host sample code.
